

THE BUCKER EVOLUTION BEGINS NOW!

GC BUCKER

** Indoor and outdoor stands available with the option of industrial casters or flat free off-road tires.

GC refers to "Gentle Cut" as we appreciate and understand how delicate flowers are. Similar to scissors, this bucker cuts the flowers off the stem, as opposed to pulling and popping them. This cutting action prevents the large crown buds from breaking apart into smaller pieces, thereby keeping the complete structure of the buds fully intact preserving the look of the flower.

GC1

The GC1 can do the work of 2-3 human workers and will buck 40+ pounds – per hour – of fully hydrated flowers! The GC1 features a 0.25 hp motor which produces over 3000 cuts per minute. The GC1 bucker is the perfect tabletop machine (optional bucker stand available!) and comes with a cleaning system which removes and collects all debris into a vacuum bag, making clean up a breeze. The GC1 is easy to set up, clean and requires little maintenance.

PRICE \$4995 USD	BUCKS 40+ lbs/hr	REPLACES 2-3 HUMAN WORKERS	PRICE \$12,495 USD	BUCKS 120+ lbs/hr	REPLACES 6-9 HUMAN WORKERS

GC1 - SPECIFICATIONS

Workers Needed	1
Warranty	2 years

GC3

Whether you buck wet or dry, the GC3 bucker will successfully de-stem flower at a rate of 120 pounds (or more) per hour of fully hydrated flowers. In aligning with our goal of being as gentle as we can on flowers, this system also provides unparalleled processing capacity. The GC3 comes complete with three 0.25 hp motors which produce in total over 10,000 cuts per minute. In addition, this triple workstation features a cleaning system, which removes and collects all debris into a vacuum bag, making clean up a breeze.

HP BUCKER

** Indoor and outdoor stands available with the option of industrial casters or flat free off-road tires.

HP refers to "High Performance" and represents our workhorse line of buckers, which include the HP1 and HP3. The high production value of these machines results in the industry's highest buck rate per hour. The HP line utilizes two rollers that pull the stem into the machine, therefore popping the flowers off. This allows you to continuously feed the bucker for more efficient de-stemming.

HP1

The HP1 has a single workstation that is suitable for tabletop use or can be combined with an optional bucker stand. The HP1 offers 5 different sized holes to provide versatility and accepts wet or dry stems up to 3/4" in diameter. This powerful model can buck 175 pounds (or more) per hour making it very quick and effective, replacing 5-7 humans. The HP1 Bucker comes complete with a 0.75 HP gear driven motor with variable speeds to provide unsurpassed power and adjustability. The system is easy to set up and is made of stainless steel and anodized aluminum making it robust as well as easy to clean.

PRICE \$13,495 USD	BUCKS 175+ lbs/hr	REPLACES 5-7 HUMAN WORKERS	PRICE \$26,995 USD	BUCKS 500+ lbs/hr	REPLACES 15-21 HUMAN WORKERS
--------------------------	--------------------------------	-----------------------------------------	--------------------------	--------------------------------	-------------------------------------------

HP1 - SPECIFICATIONS

Gear Driven Motor	0.75 HP
Workers Needed	1
Input Voltage	110V / 15 amp
Warranty	2 years

HP3

When combined with the high productivity of a CenturionPro trimming machine, you'll get the highest capacity harvesting system in the world! The HP3 comes complete with three 0.75 HP gear driven motors with a variable speed controller to provide unsurpassed power, adjustability and control. Thanks to the variable speed controls, wet or dry product can be processed with ease! The system is easy to set up and is made of stainless steel and anodized aluminum making it robust as well as easy to clean.

PRICE \$13,495 USD	BUCKS 175+ lbs/hr	REPLACES 5-7 HUMAN WORKERS	PRICE \$26,995 USD	BUCKS 500+ lbs/hr	REPLACES 15-21 HUMAN WORKERS
